

MORE THAN COATINGS: PERFECT SKIN

WOODEN HOUSES

WOODEN HOUSES

The demand for wooden houses has constantly risen in recent years. This particular form of house construction has a long tradition and is now becoming more popular again – also thanks to the continuous modification of the appearance of the wood, the processing and the technology. One reason is that wood is a natural, renewable material with an outstanding eco-balance. Furthermore, a wooden house creates a healthy climate and a comfortable living atmosphere. And wood is universal and can be used for all kinds of wooden house constructions.

Irrespective of the individual construction, wood and design, all wooden houses have one thing in common. The wood surfaces require protection against sun, rain or hail. To create the perfect skin for wooden houses VR Coatings has developed two products: SEDIPAN WACT 640 and SEDIPAN WACT 650. The low VOC level products protect the wood surface against weathering and create a natural and brilliant look & feel. And the best thing is: in order to maintain the wooden house, these two products can be used too.

Systems

- 1. 3 x SEDIPAN WACT 640
- 2. 3 x SEDIPAN WACT 650 (brush)

Benefits when using our products for wooden houses

- Ecological thanks to the low VOC level
- A long-lasting perfect skin in matt or glossy finish in a world of colour
- Easy to maintain as the same products can be used
- Perfect protection thanks to the UV absorber in every product
- Optimal water repelling properties on the surface
- Reduction of storage capacity thanks to the 2in1 (3in1) products and reduction of material consumption thanks to the good hiding power
- Products dry very quickly (less time needed)
- Ventilating system, which protects the wooden surface from cracks and blistering
- Low water uptake even under extreme conditions, which increases durability

SEDIPAN WACT 640

PRODUCT CODE: V640R912Cxx

TOPCOAT	Waterborne translucent 3in1 (primer, mid-topcoat)	AREA OF USE	APPLICATION TYPE	PACKAGING
	low film building, all-in-one product, contains UV-Filters, water-repellent, no flaking during weathering, matt, natural surface, 3 years warranty, can be used for easy maintenance	  semi stable, unstable	   dipping, flow coating, brush	5 l/20 l
	Colours: On request
